

Okinawa Okhi-90 electric scooter launched in India: Check price, range, specs, features, etc.

Okinawa Okhi-90 comes with a 3.6 kWh detachable battery pack that powers a 5 bhp (peak power) electric motor. This setup allows the electric scooter to reach a top speed of 90 km/h in 10 seconds and offers a riding range of 160 km per charge. The Okhi-90 comes with a coloured instrument cluster and Okinawa Connect app for geo-fencing, trip history, speeding alerts, SOS alert, and more.

Okinawa Okhi-90 e-scooter launched

Okinawa has revealed the Okhi-90 electric scooter's price in India; the Okhi-90 gets a price tag of ₹1.22 lakh (ex-showroom), putting it on the list of premium scooters in the country. The Okhi-90 had been in the making for a while and the test mules had been spotted several times. In the build-up to the launch, Okinawa had also teased the Okhi-90, revealing some crucial details about the electric scooter. But now that this EV has hit the market, we have all the information about it, including battery capacity, range, and top speed. Okinawa Okhi-90 looks like a cross between a motorcycle and scooter, thanks to its 16-inch wheels and a compact front fender. The e-scooter features a curvy front apron with LED DRLs and indicators, a chrome garnish, an LED headlamp with chrome garnish, aluminium levers, chrome rearview mirror, a wide step-up seat, chrome garnish for the side panels, LED tail light, and an integrated grab rail.

Okinawa Okhi-90 has a spacious floorboard and a large storage area of 40-litres, making it a very practical option. Powering the Okhi-90 is a 3.6 kWh detachable battery pack that powers a 5 bhp (peak power) electric motor. This setup allows the electric scooter to reach a top speed of 90 km/h in 10 seconds and offers a riding range of 160 km per charge in Sports mode. And as for charging, the Okhi-90 can be charged from zero to 80 per cent in one hour but completely charging that battery takes around four hours.

Okinawa Okhi-90 comes with an LCD unit as standard but customers can opt for a coloured digital instrument cluster that offers all the essential readouts, including battery voltage information. Other features on the electric scooter include key-less remote, regenerative braking, boot light, USB port, automatic key locking system, parking mode, Eco and Sports riding modes, and side-stand sensor with start inhibitor. Okinawa Okhi-90 will also get access to the Okinawa Connect smartphone app for a raft of provisions, including geo-fencing, vehicle location and navigation, trip history, speeding alerts, SOS alert, curfew alert, ride diagnostics, and more.

Just like most of its rivals, the Okhi-90 uses telescopic forks with twin rear shock absorbers while the braking duties are tended to by front and rear disc brakes with a combined braking system. However, the e-scooter also gets an aluminium swingarm.
